SUMMARY

Full-stack software engineer with 8 years of experience building production web and mobile applications with React, TypeScript, and Redux, plus Java Spring Boot microservices deployed on Kubernetes and AWS. Led a micro-frontend redesign of Puttshack's primary website and built reusable component systems shared across web and React Native apps. Background spans financial services (BNY Mellon), real-time data applications (Epsilon), and consumer products. Known for clean, maintainable code and close collaboration with back-end teams on API design.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, SASS, LESS, SQL

Front End: React, Redux (redux-thunk), Next.js, React Native, Vue 3, Quasar, Material UI, Bootstrap, Axios

Back End & Data: Java Spring Boot, Node.js, RESTful APIs, WebSockets, Kubernetes, AWS, SQL Server, MySQL, MongoDB

Architecture: Microservices, micro-frontends, component-driven design, single-page applications, responsive / mobile-first UI

Testing & Tooling: Jest, React Testing Library, Cypress, Webpack, Babel, Vite, Git/GitHub, JIRA, Agile

EXPERIENCE

Puttshack

Feb 2022 – Jun 2026

Senior Full Stack Developer

FL

- Led a full redesign of the company's primary website on a micro-frontend architecture, letting the marketing team manage content and launch new features without engineering involvement.
- Designed and built back-end microservices in Java Spring Boot, containerized and deployed on Kubernetes in AWS, serving the company's web and mobile applications.
- Built and maintained React and React Native mobile applications with Redux state management and RESTful API integration, responsive across devices.
- Developed a library of reusable React components (form validation, navigation, menus, carousels) shared across projects to reduce duplicated UI code.
- Implemented a Node.js authentication server for the company's applications.
- Configured Webpack and Babel builds to optimize bundle size and load performance.
- Integrated Quasar into a Vue 3 application to standardize styling and extend functionality.
- Reviewed pull requests with a focus on code quality, readability, and maintainability.

Relevnt

Jul 2021 – Mar 2022

Front End Developer

FL

- Built React and React Native mobile app screens backed by Redux and RESTful services, using Vite for faster development builds.
- Developed full-stack features with Node.js and React.
- Wrote unit tests with Jest and React Testing Library to protect key user flows.
- Translated design mock-ups into standards-compliant, responsive layouts and forms with client-side validation.

Epsilon

Feb 2019 – Jul 2021

Front End Developer

FL

- Implemented real-time updates of candidate information using WebSockets, eliminating manual page refreshes.
- Built React/Redux single-page application screens integrated with RESTful web services.
- Converted static HTML markup into JSP views using JSTL for a Java-based web application.
- Developed features with Node.js and React; created modular, reusable styles with LESS and Bootstrap.

BNY Mellon

Jun 2018 – Jan 2019

Front End Developer

FL

- Built a React/Redux single-page application with React Router, consuming RESTful services via Axios and handling async actions with redux-thunk.
- Presented back-end data in tables and charts, and worked with MongoDB and application routing.
- Partnered with the back-end team to define API requirements and data-passing standards.
- Implemented responsive, mobile-friendly layouts and wrote Jest unit tests in an Agile/JIRA workflow.

EDUCATION

Lambda School — Software Development
